

SuCaLess®

SUMIYAKI CHARCOAL ROASTED COFFEE

98%
Less Sugar

- Our coffee beans underwent a tried-and-true method that used charcoal as a heat source that slows down the deterioration rate of the coffee bean giving it a longer shelf life and ultimately giving you a cup of coffee that is rich, strong, smoky smell and savory taste to it.
- ONLY added 0.2g of SuCaLess Low GL Sugar to achieve same sweetness compare to other brand in the market that usually put 15g of white sugar in their premix coffee. So the intake of sugar and calories reduce which leads to a healthier lifestyle.

Benefits of Korea BAMBOO SALT

Contain over 76 minerals
